

HARRIER

Never Stop Wanting More.

The new Toyota Harrier marks another milestone on the journey to true driver-centric luxury. The elegant Harrier shape is further evolved and taken to new, sleeker heights, while the interior boasts innovations that benefit both driver and passengers alike. With a new hybrid variant on offer, the Harrier also delivers greater fuel efficiency and economy.

Experience the new Harrier. More luxurious and more enticing to drive than ever.

The images in this brochure feature vehicles that may have different details and specifications to those available, depending on the variant.

Exterior

From any angle, the Harrier sets itself apart. Its elegant, sculpted exterior lines are perfectly complemented by a low centre of gravity, a sleek, tapered roofline and dual exhaust pipes.

Projector-style LED headlamps light the way, while a full-width rear LED light bar leaves a lasting impression.

LED HEADLIGHTS

Projector LED headlights and LED Daytime Running Lights give the Harrier an iconic look and a captivating presence—day or night.

LED TAILLIGHTS

The distinctive full-width rear LED light bar is the perfect summation of the Harrier's modern look.

HANDS-FREE POWER BACK DOOR WITH KICK SENSOR

Enjoy easy access to the Harrier's boot with a hands-free power back door and memory function. Standard on all variants, the rear door can be operated with a wave of your foot under the rear bumper.

Interior

The Harrier's interior tests new boundaries of luxury with its premium materials and exceptional attention to detail. Ambient lighting welcomes you to a driver-focused cockpit, elegantly equipped with impressive technology and sophisticated styling.

AMBIENT LIGHTING

The Harrier knows how to set the mood. After the sun sets, the Harrier's ambient lighting creates a refined cabin atmosphere for late-night rides.

QUALITY CRAFTED SEATS

When you're behind the wheel, the Harrier's 8-way power driver's seat with 4-way lumbar support lets you customize your seat to suit you perfectly. Harrier Premium and Luxury variants feature ventilated front seats, driver seat memory plus an auto slide away function that automatically moves the seat to the rearmost position to ease your entry and exit. All wrapped in genuine leather, with unique seat bolster stitching for an added touch of style, you'll be ready for whatever the day brings.

PREMIUM INFORMATION DISPLAY

The Harrier makes it easy to access the information you need, with a 7" multi-info display, three-dimensional sunburst scale speedometer and a large 10.5" Head-Up Display that gives you access to time-sensitive information without having to take your eyes off the road.

DIGITAL MIRROR (AVAILABLE ON LUXURY VARIANT)

The benefit of the digital mirror is that the driver's view is no longer obscured by anything in the car's interior, like passengers and luggage. At night, glare is reduced, and visibility is enhanced. An additional benefit is that different drivers no longer need to adjust the mirror to suit their position.

DUAL ZONE AUTO AIRCON WITH NANOE™ X

Both front-seat occupants can tailor the environment to suit their preference, as the dual-zone air conditioning enables both driver and passenger to select different temperatures. While the nanoe™ X system cleans the air as it cools, suppressing allergens and odours.

APPLE CARPLAY® & ANDROID AUTO™

Connect your mobile device to the Harrier's Infotainment Unit and the soundtrack to every journey will always be the music you love.

WIRELESS CHARGING

In today's always-on world, staying connected is vital. To ensure your favourite mobile device is always fully charged, the Harrier features a conveniently placed wireless charging pad.

DRIVE MODE SELECT

With the simple flick of a switch, you can tailor the Harrier's performance and personality. SPORT mode sharpens throttle response for more high-spirited performance. ECO helps to maximize mileage from the fuel and battery. EV mode (only available on hybrid models) allows electric-only driving at low speeds for short distances. While NORMAL is ideal for everyday driving.

ROOMINESS & VERSATILITY

The Harrier can easily fit 2 golf bags or 2 suitcases for your weekend get-aways. The 60:40 split-folding rear seats open up even more options for bringing friends or family along for the ride, or carrying the gear you'll need for your latest adventure.

DIMMABLE PANORAMIC MOONROOF (AVAILABLE ON LUXURY VARIANT)

A Toyota first, the Harrier Luxury Variant features a Dimmable Panoramic Moonroof. Electrochromic glass technology allows you to switch from transparent to frosted mode—which reduces direct sunlight, giving the cabin an even more open and airy feel. All at the push of a button.

RIDE & HANDLING

The Harrier's refined and intuitive driving experience starts with its Toyota New Global Architecture platform (TNGA - K). Coupling high strength with a low centre of gravity, the Harrier delivers smooth acceleration and crisp, responsive handling. MacPherson strut suspension up front and multi-link in the rear contribute to the Harrier's smooth ride.

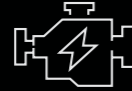

Hybrid Power

The Harrier's next generation Toyota Hybrid System delivers the best of both worlds—impressive power output, coupled with unparalleled fuel efficiency. The system combines a 2.5-litre Dynamic Force four-cylinder engine with an electric motor to deliver 215 horsepower. With the Electric Motor Generator delivering 202Nm of Instantaneous Torque, smooth acceleration from 0-100km/h is achieved in 8.1sec.

2.5-LITRE DYNAMIC FORCE ENGINE WITH HYBRID SYNERGY DRIVE

The system combines a 2.5-litre Dynamic Force four-cylinder engine with electric motor to deliver 215 horsepower. The Harrier's engine power is boosted with an Electrical Motor Generator to achieve 202Nm of Instantaneous Torque, achieving smooth acceleration from 0-100km/h in 8.1 seconds.

CLASS-LEADING FUEL ECONOMY OF 21.2 KM/L

Sound economics always make sense. With the Harrier delivering an astonishing 21.2km per litre, every visit to the petrol pumps is guaranteed to take you further.

SELF-CHARGING HYBRID

The Harrier's hybrid battery recharges on the go, using innovations like regenerative braking to capture and transform energy into electricity and store it in the battery.

NO ADDITIONAL MAINTENANCE

Toyota's high-performance batteries are designed to last and require no additional routine maintenance. In fact, they follow the same maintenance schedule as our conventionally powered vehicles.

LOWER CO₂ EMISSIONS

The hybrid system within the Harrier ensures that every journey isn't just smoother, it also generates lower CO₂ emissions, which is why the Harrier has a Vehicle Emissions Scheme (VES) rating of A2.

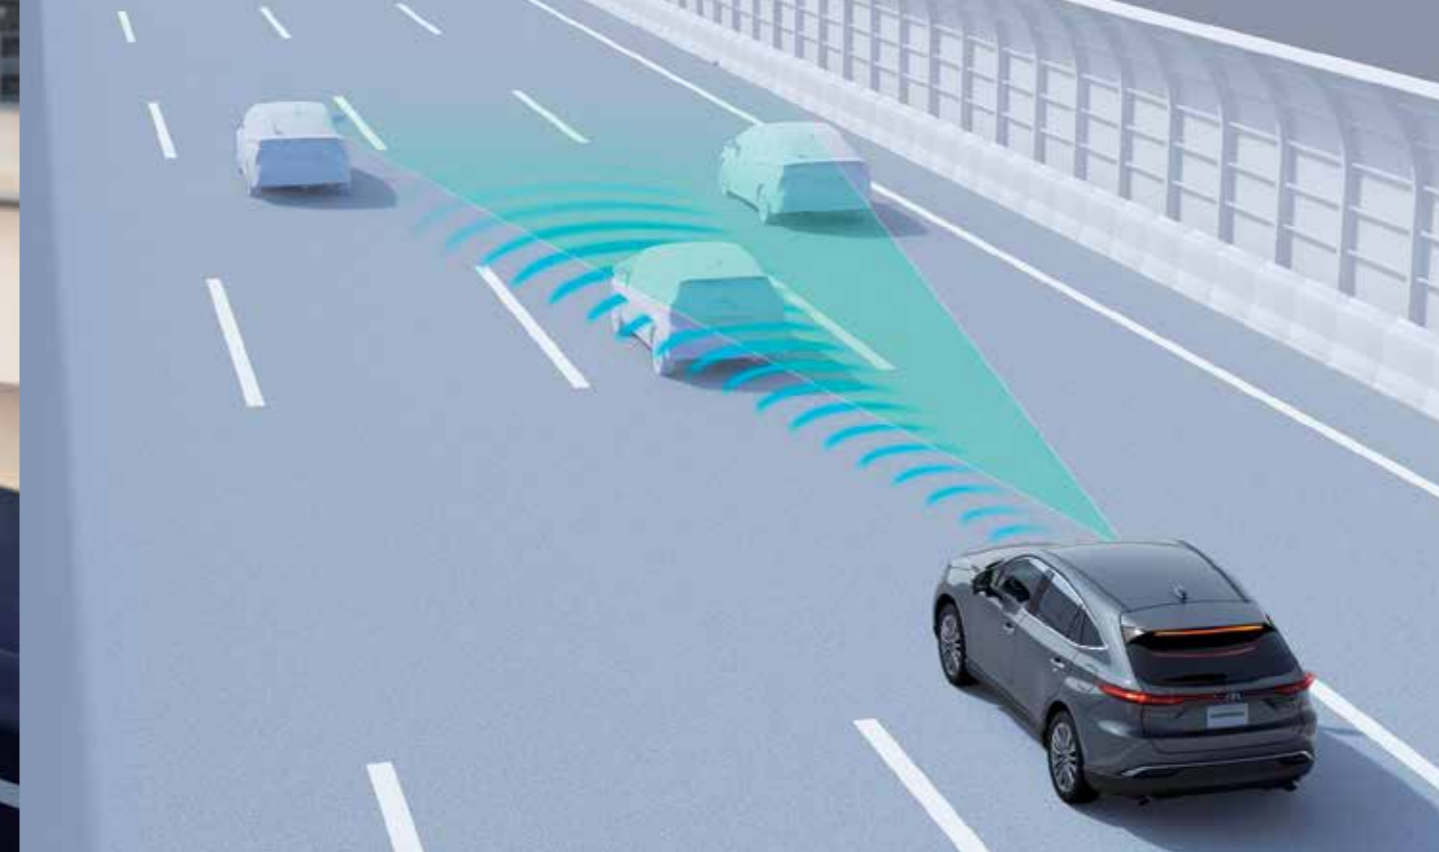

EXCEPTIONALLY QUIET

An interior as luxurious as the Harrier's deserves to be appreciated in peace. The hybrid system ensures that engine noise is reduced to a whisper.

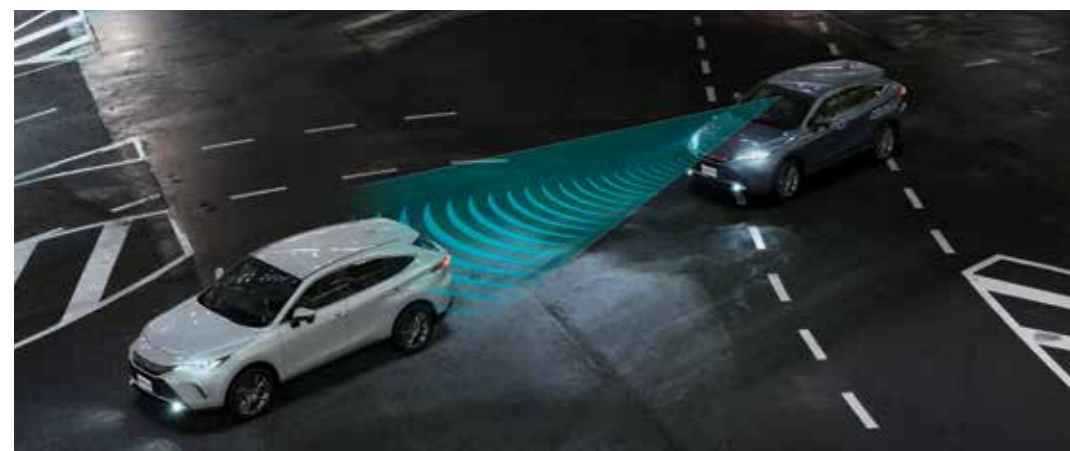

HYBRID

DYNAMIC RADAR CRUISE CONTROL (DRCC)

Dynamic Radar Cruise Control (DRCC) makes cruising even more effortless. Using forward-sensing radar technology and an intelligent camera, the system is designed to detect the speed and distance of the vehicle traveling directly ahead of you and adjust your speed accordingly. In heavy traffic, it maintains a pre-set following distance, slowing when it shortens and accelerating back to your original cruising speed when the road clears.

PRE-COLLISION SYSTEM (PCS)

The Pre-Collision System with Pedestrian and Cyclist Detection can detect and alert you to an oncoming vehicle or a pedestrian/cyclist in certain situations. By combining a millimetre wave radar with a camera capable of shape recognition, the system will warn you of a possible collision and, in certain conditions, brake automatically if you don't react in time.

LANE TRACING ASSIST (LTA)

When Dynamic Radar Cruise Control (DRCC) is enabled and lane markers are visible, Lane Tracing Assist (LTA) uses the lines on the road and the vehicles ahead of you to help keep the car centred and in its lane.

ADAPTIVE HIGH-BEAM SYSTEM (AHS)

This smart sensor detects the headlights and taillights of cars in front of you, and automatically optimizes the headlamp light distribution to ensure you never dazzle other drivers, making driving safer for you and your fellow road users.

LANE DEPARTURE ALERT (LDA)

The Lane Departure Alert (LDA) system identifies visible lane markings and detects an inadvertent lane departure. It will then issue both an audible alert and a visual warning. If the system determines that the driver is not taking corrective steering action, the Steering Assist function is designed to initiate and provide gentle corrective steering to help your car stay in the lane.

Additional Safety features

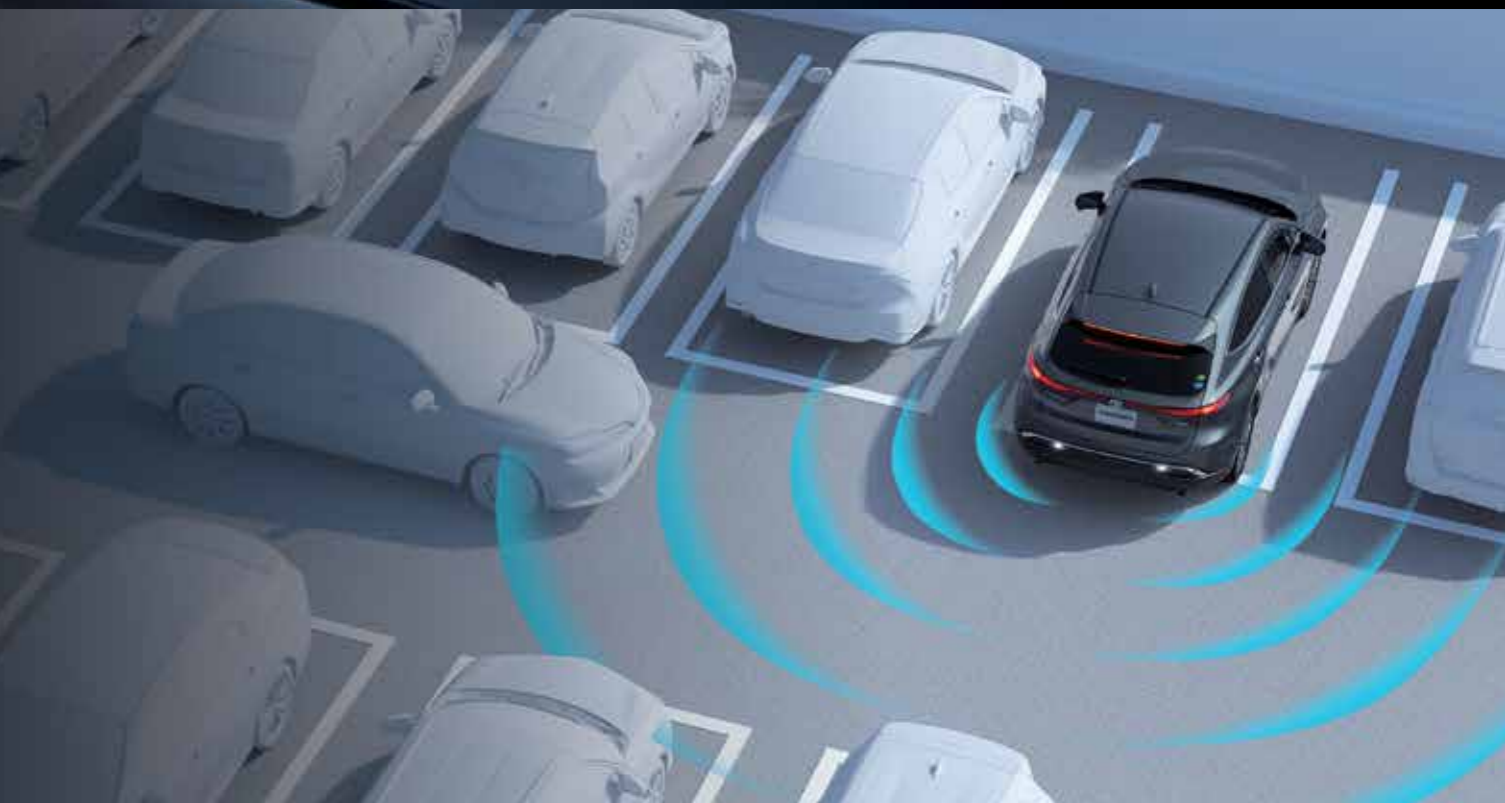

BLIND SPOT MONITOR WITH REAR CROSS TRAFFIC ALERT (RCTA)

The Harrier's Blind Spot Monitor alerts you to the presence of vehicles that may have entered the blind spot on either side of the vehicle, helping to make lane changes safer. While Rear Cross Traffic alert warns you of approaching cross traffic while backing up.

PARKING SUPPORT BRAKE (PKSB)

The Harrier audibly warns you when front and rear sensors detect stationary objects or vehicles approaching from the rear. If the system determines there may be contact, it will send an alert inside the vehicle and reduce engine power or apply the brakes.
