DRIVING INNOVATION SO YOU CAN DRIVE BETTER.

Investing almost US\$9 billion a year, Toyota is the world's top R&D spender (averaging about US\$1 million an hour). A worthy investment towards creating ever-improving technology, sturdier rides and a Toyota that you can count on. All of which you'll find embodied in the Camry.

With an innovative Direct Injection 4 Stroke (D-4S)* petrol engine, the Camry maximises charging efficiency and output by employing port, direct or even simultaneous injection. This is combined with an updated VVT-iW system, which runs on the Atkinson cycle for greater fuel efficiency and performance. While an intelligent gearbox with a 6-speed Super Electronic Control Transmission delivers a smarter, smoother drive.

Our dedication to anticipating your mobility needs at every turn has shaped us into a global leader in quality, durability and reliability.

At Borneo Motors, we go beyond just delivering a great car. From quality control to aftersales service, we do all that we can so you can drive your Toyota better, safer and easier.
